an argument for justifying the welfare state politically rather than economically based on an ideal of democratic equality since the reagan and thatcher revolutions of the 1980s there has been little consensus on what welfare ought to do or how it ought to function at the same time post wall continental europe searches for a third way between state planned socialism and laissez faire capitalism in reflexive democracy kevin olson takes on this contemporary conceptual crisis he calls for a political turn in considerations of the welfare state arguing that it should no longer be understood in primarily economic terms as a redistributive and regulatory mechanism but in political terms as a means of living up to deep seated values of political equality drawing on arguments by t h marshall and

Jürgen Habermas and John Rawls propose a conception of political equality as the normative basis of the welfare state. He argues that there are inextricable connections between democracy and welfare. The welfare state both promotes political equality and depends on it for its own political legitimacy. The paradox of political equality as a precondition for political equality is best solved, Olson argues, by guaranteeing citizens the means for equal participation. This is a reflexive conception of democracy in which democratic politics circles back to sustain the conditions of equality that make it possible. This view, Olson writes, is meant not to replace traditional economic concerns but to reveal deep interconnections between democratic equality and economic justice. It counters paternalistic ideas of welfare reform by focusing on citizen participation. This conception moves beyond simple equality in the possession of goods and resources to propose a rich, materially grounded conception of democratic equality.

Borderland Religion presents and interprets the fascinating and significant practices when borders, migrants, and religion intersect. This collection of original essays combines theology, philosophy, and sociology to examine diverse religious issues surrounding external national borders and internal domestic borders as these are challenged by the unstoppable flow of documented and undocumented migrants. While many studies of migration have examined how religion plays a major role in the assimilation and integration of waves of migration, this volume looks at a number of empirical studies of how emergent religious practices arise around border crossings. The volume begins with a detailed analysis of the borderland religion context and research. The aim is to bring an eschatological interpretation of the borderland religion, its impact and significance for migrants. Themes include a critical analysis of

how religion has formatted europe empirical studies from the us mexican border and southern africa an overview of the european refugee crisis in 2015 editors account of borderland religion from the perspective of citizenship studies contributions of scholars from a broad range of disciplines ensure a careful analysis of this highly topical situation the volume s interdisciplinary profile will appeal to scholars and students in religious studies migration studies theology and citizenship studies
