a non technical but serious treatment of those parts of earth history leading up to human history as well as some pre historical aspects of humanity many events in earth s history necessarily preceded the emergence of human beings and intelligence geology has provided us with a great deal of information about these various steps on the way to intelligent life and how and why they were important some of these events were on a cosmic scale no universe no life some were planetological astronomical no earth no life some were essentially chemical how did life emerge in the primordial ocean and why do we have oxygen in the atmosphere and some were details of evolutionary history how did life colonize the land and how did mammals develop in this book an enthusiastic professor of geosciences presents a broad introduction from the big bang to the present and into the future lucidly explaining aspects from various disciplines to interested non specialist readers

serious philosophy is not an attempt to construct a system of beliefs but the activity of awakening the conversation passionately pursued only if professional philosophy reclaims this paradigm and finds ways to embody it will it achieve an active place in the thought and life of our culture james conlon stanley cavell and the predicament of philosophy this book is a collection of serious philosophical essays that aim to awaken readers teachers and students to a desire for conversation passionately pursued the essays in this volume speak about sex movies poetry and politics in short about those things contemporary americans passionately discuss these are the subjects that were taught for forty three years in james conlon s classroom at mount mary university a catholic urban university for women in milwaukee wisconsin this volume celebrates conlon s work while calling to all who continue to teach and learn about philosophy in contemporary times with the message that relevant philosophy deals with life as it is lived in the moment

the weimar moment s evocative assault on closure and political reaction its offering of democracy against the politics of narrow self interest cloaked in nationalist appeals to volk and community or as would be the case in nazi germany race cannot but appeal to us today this appeal its historical grounding and content its

complexities and tensions its variegated expressions across the networks of power and thought is the essential context of the present volume whose basic premise is unhappiness with hegel s remark that we learn no more from history than we cannot learn from it the challenge of the papers in this volume is to provide the material to confront the present effectively drawing from what we can and do understand

this is a collection of peer reviewed papers originally presented at the 19th australasian conference on the mechanics of structures and materials by academics researchers and practitioners largely from australasia and the asia pacific region the topics under discussion include composite structures and materials computational mechanics dynamic analysis of structures earthquake engineering fire engineering geomechanics and foundation engineering mechanics of materials reinforced and prestressed concrete structures shock and impact loading steel structures structural health monitoring and damage identification structural mechanics and timber engineering it is a valuable reference for academics researchers and civil and mechanical engineers working in structural and material engineering and mechanics
